

# SupplierPortal

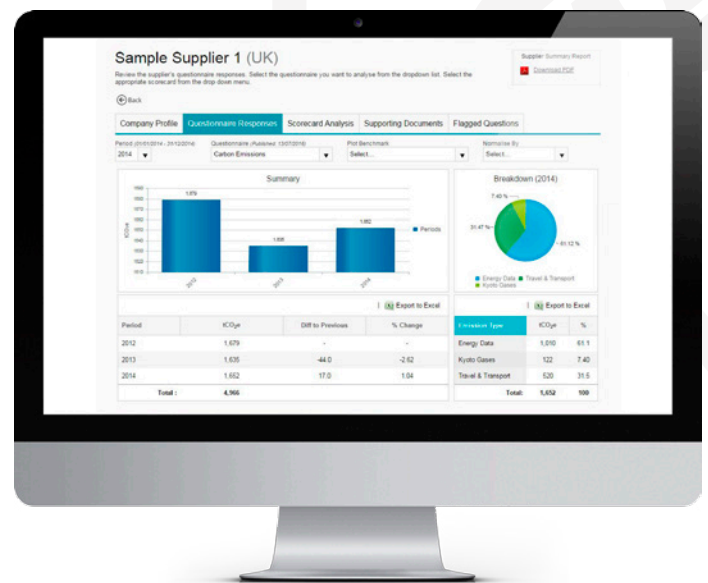

**SupplierPortal** provides your business with a single point of **transparency** across your supplier network, ensuring that **compliance**, **contracts**, and **risk** can be managed seamlessly.

## Do you have...

- Multiple systems managing different supplier information?
- Multiple departments managing supplier relationships?
- Increasing requirements to comply with supply chain legislation?
- A lack of visibility of supply chain risks?
- Inconsistent manual processes for contract management?

## The SupplierPortal solution

-  Single platform for supplier information and analysis
-  Best practice and bespoke supplier assessment questionnaires
-  Risk flagging and scorecards
-  Contract management
-  Audit facilitation and storage
-  Integration with ERP and procurement systems
-  Compliance reporting

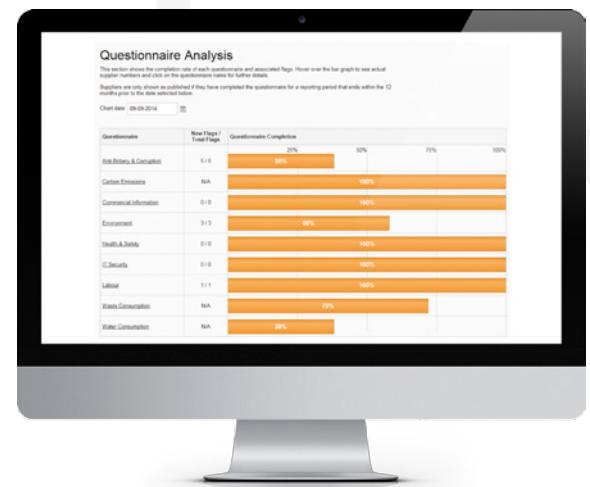

## How it works

SupplierPortal provides a single point of transparency through which your business can manage its suppliers. Setting up SupplierPortal seamlessly enables you to manage and segment your suppliers, ensure all contracts are maintained appropriately, and meet ongoing supply chain legislation and expectations.

### Starting to manage your suppliers through SupplierPortal is simple:

1. Identify, upload, and segment your suppliers.
2. Upload current and historical contracts.
3. Distribute assessment questionnaires to relevant suppliers.
4. Receive automated notifications to ensure effective supplier and contract management.
5. Use flexible analysis tools to access and report supplier information.
6. Have confidence in your data and ongoing supplier compliance.

## Why Greenstone?

- **Data that talks to you:** easy-to-use solutions that we guarantee will give you accessibility to the information you need to manage your business.
- **Customisation:** SupplierPortal is a flexible solution designed to be configurable to your requirements.
- **Analytics:** our robust analytical tools ensure you can identify risk and monitor performance.
- **Support:** we provide uncapped support from our team of subject matter experts and enterprise software professionals.
- **Experience:** our platform has been tried and tested globally for the last 10 years and is now used by clients in over 100 countries.
